Course analysis BIOR20 “Sensory Biology” autumn 2019

Course leader: Dan-E. Nilsson
Other teachers:
Almut Kelber, Adriana Schatton, Bo Bekkouche, Cody Manchester, Eric Warrant, Glenn Svensson, Josiane
daSilva Freitas, Martin Andersson, Marie Dacke, Marjorie Lienard, Mikael Ljungholm, Marcel Sayre, Olle
Anderbrant, Pierre Tichit, Ronald Kröger, Stanley Heinze, Sandra Chaib,

Number of students: 23 registered students

Grades: 2 Fail (U), 16 Pass (G), 5 Pass w distinction (VG).

Evaluation
I. Summary of the course evaluation
Number of answers: 13
Short summary of the result: The course has been given for many decades and continuously improved and tuned to student and teacher comments. The course is generally much liked and was so also this year. The students particularly like the lectures and compendia (over a textbook), and also the exams split into four parts at different times. The students were also happy about the practicals, and the individual project. The main concern with the course was too little time for tutorials. We tested a new format for tutorials, which seems to have been much appreciated, with the exception that we need to increase the time for tutorials.

II. Comments from the teachers team
The teachers agree that the new format for tutorials worked well but need a little more scheduled time.

III. Evaluation of changes made since the previous course
The new format for tutorials made a clear improvement

IV. Suggested changes for the next course
Tutorials will get 50% more time
