Course analysis BIOR31 Molecular Biotechnology spring 2019

Course leader: Mats Hansson
Other teachers: Wolfgang Knecht, Christer Löfstedt, David Stuart, Shakhira Zakhrabekova, Helmy Youssef, Fredric Carlsson, Annika Rogstam, Ewa Krupinska, Céleste Sele.

Number of students: 27 registered students

Grades: 1 Fail (U), 9 Pass (G), 17 Pass with distinction (VG).

Evaluation

I. Summary of the course evaluation
   Number of answers: 14
   Short summary of the result: Overall the students were very pleased with the course (grade 4.3). The students especially appreciated the teachers (4.5), the rich variation of teaching forms (4.5), the plant lab (4.4), the presentations by people from the industry, and the site visits (4.6) but suggested that we should have more group discussions.

II. Comments from the teachers team
   The teachers on the course considered that the course had a good flow and that the students were interested in the subject.

III. Evaluation of changes made since the previous course
   After the previous course we increased the number of group discussions but we can probably have more.

IV. Suggested changes for the next course
   The next time the course is given we plan to expand on “Biotechnological challenges” so they can dive into very high tech biotechnological challenges. This should be done in pairs. Also do “Your company” in pairs otherwise we get to many presentations.
