Dear student,

You are admitted to the Master's programme in Molecular Biology – Microbiology, 120 cr. I am your study advisor at Lund University and I wish you warmly welcome to Lund!

You need to accept your offer not later than July 27. Don’t forget to do so. Accept or decline here: [http://www.universityadmissions.se](http://www.universityadmissions.se)

Housing
If you do not have housing, please check the advertised housing at Bopoolen.nu. Another option for housing is to apply through AF bostäder. They have an annual housing lottery for new students. The application starts July 12-July 15. Read more about AF Bostäder and the annual lottery here.

One term is divided into two periods. Normally you take one course of 15 credits each period and 2 courses each term. You are admitted to the following compulsory courses:

The first period:
- **BIOR79 - Methods in Molecular biology**

The second period:
- **BIOR18 – Microbiology**

You apply for the spring term courses later; the 15th of September to the 15th of October.

The schedules will be available on the course web-pages not later than four weeks before the courses start. Please note that most courses have compulsory activities almost every day. Do not plan e.g. travelling on “school days”. If you miss a compulsory activity without a legitimate reason, you may not be able to complete the course until the following year. You must also attend the first day of the courses you are admitted to. The first day of a course is always compulsory.

**Important dates:** Arrival day is the 20th of August 2018. The autumn term starts the
3rd of September and ends the 18th of January, 2019. Christmas Holiday is December 22nd until January 6th 2019. Spring term 2019 starts the 21st of January until the 7th of June. Easter break is 18th to 29th of March. There is also a holiday the 30th of April to 1st of May (“Valborg” and Labor day), and the 30th-31st of May (Ascension Day) as well as the 6th of June (Swedish national day).

The department of Biology have introduction activities for new Biology, Molecular Biology and Bioinformatics master’s students Monday 27th to Thursday the 30th of August. See Schedule.

I look forward to seeing you at the department of Biology at Lund University!

Best regards from
Tina (Christina) Ledje
Study advisor and Master’s coordinator in Molecular Biology at Lund University
